# What We Do

The Thriving After Cancer Survivorship Clinic provides comprehensive care for survivors of childhood and adult cancers. Our multidisciplinary team is focused on the medical and emotional impact of cancer and its treatment.

Our goal is to help you attain the best quality of life. The survivorship clinic teaches you about the potential late side effects of your treatment. It also explains what you should be doing to maintain and improve your health.

## Our Team Approach

Our team includes a nurse practitioner, oncologist, internist, social worker, registered dietitian, nurse navigator, neurologist and psychiatrist.

Together, we provide comprehensive care to cancer survivors.

We focus on:

- Education
- Symptom Management
- Wellness

## Survivorship Education

At the end of the visit you will receive a survivorship care plan, which includes:

- A summary of your treatment
- An outline of the potential late effects of your treatment
- Nutrition and physical activity recommendations
- Cancer screening recommendations

## Care and Support

Our clinic provides you with medical services, including a comprehensive physical exam, but your care doesn't stop there. We also connect you with:

- Physical therapists and physical activity programs
- Emotional support and therapy
- Registered dietitians
- Educational events
- Resources for cancer survivors

## What to Expect During Your Visit

If your insurance requires a referral, please obtain one prior to the visit. Please allow one to two hours for your visit. You will be provided with your survivorship care plan at the time of the visit. Any necessary referrals will be made at the end of the visit.
